HU30M

6.3Fr

Working Channel Diameter

3.6Fr

With an ultra-slim 6.3 Fr outer diameter, the HU30M ureterorenoscope offers unprecedented control over intrarenal pressure and temperature during RIRS procedures. HugeMed™ HU30M creates more physical working space than ever before, making RIRS feasible for patients with congenital ureteral strictures, ureteral tumors, or bleeding disorders — cases that were previously considered challenging or even inoperable.

BULLET-TIP DESIGN

Pass the urethra smoothly with minimal risk of urethral trauma.

Easier Cystoscopy for Both Doctors and Patients

The HugeMed™ single-use cystoscope is single-use, portable and easy to operate, which are helpful for operating cystoscopy in OPDs or community hospitals with inadequate resources for heavy and expensive devices. Meanwhile, the high flexibility makes patients more comfortable, even without anesthesia.
